

Profile

Flutter Developer with 1+ years building high-performance cross-platform mobile applications, Proficient in state management, Firebase integration, and Clean Architecture. Proven ability to deliver intuitive user experiences and collaborate effectively to achieve project goals.

Technical Skills

Languages & Frameworks: Flutter, Dart

State Management: Bloc, Cubit, Provider

Architecture: Clean Architecture, MVVM, SOLID, Design Patterns, DI (GetIt)

Backend & APIs: REST, GraphQL, Firebase (Auth, Firestore, Storage, Analytics, Crashlytics)

Data & Storage: Hive, Sqflite, Shared Preferences, Freezed, Equatable

Testing: Unit, Widget, Integration Testing

CI/CD: Fastlane, GitHub Actions, DevTools

Other: Git/GitFlow, Platform Channels, Deep Linking, Payment Integration, Performance Optimization

Soft Skills

Collaborative team player with strong communication skills || Efficient in time management and task prioritization || Analytical thinker with solid problem-solving abilities || Adaptable to new technologies and frameworks || Proactive in identifying and resolving issues || Detail-oriented with a focus on delivering high-quality code

Experience

KTLR Cat's Adoption App [GitHub] — *Cat breed discovery app with favorites & search*

- Built Flutter app with Clean Architecture and scalable modular structure using Bloc/Cubit state management.
- Integrated TheCatAPI with pagination, image caching, and Dio networking for browsing and searching breeds.
- Designed responsive UI with Google Fonts and Lottie animations; optimized performance for smooth scrolling.
- Implemented favorites system with local storage and enhanced network reliability.

CoinFlow App [GitHub] — *Real-time crypto market & portfolio management application*

- Built scalable Flutter architecture using Bloc/Cubit, feature-first modular structure, and clean separation of concerns.
- Implemented responsive and adaptive UI system supporting multiple screen sizes, tablet layouts, and landscape orientation.
- Designed a centralized theming system (colors, typography, design tokens) with full light/dark mode support.
- Integrated REST APIs using Dio with Repository Pattern and implemented dependency injection with GetIt.
- Implemented Firebase Authentication and contributed to portfolio and market feature modules.

Reciplore – Graduation Project [GitHub] — *Recipe platform with marketplace integration*

- Developed recipe application with Clean Architecture, Node.js backend, and PostgreSQL/MongoDB.
- Built recipe discovery by category, country, and ingredients with video guides and responsive UI.
- Implemented marketplace integration for ingredient purchasing with seamless user flows.
- Used Cubit for state management; deployed via Firebase App Distribution.

Route Academy – Flutter Development Cycle 10

ITI Software Cycle

Professional Development

10-Week Mobile Engineering Mentorship With [Omer Ahmed] — *Flutter Engineering Track*

- Advanced training in Clean Architecture, SOLID, design patterns, Bloc/Cubit, REST/GraphQL, and DI (GetIt)
- Trained on GitFlow, code reviews, Unit/Widget/Integration Testing, CI/CD pipelines, and Flavors
- Built features: deep linking, payment flows, caching, pagination, token refresh
- Optimized performance using Flutter DevTools (CPU, Memory, Frame Rendering)

Flutter Instructor – GDG EELU

Nov 2024 – Jul 2025

- Conducted workshops on Dart, Flutter, state management (Bloc, Provider), MVVM, and Firebase
- Mentored developers in building real-world projects with focus on best practices and problem-solving

Freelance Flutter Developer

Jan 2025 – Present

- Developed custom Flutter applications for clients across multiple domains including archaeology
- Delivered full-cycle development: UI/UX, state management, and Firebase integration

Education

Bachelor of Computer Science

2021 – 2025

Egyptian E-Learning University (EELU), Sohag, Egypt
